

Municipal council elections 2019

Værøy Christian People's Party

These candidates are on the list of Værøy KrF.

We hope you can trust these 13 people.

*We all want to do what are in our power to create a good society
for us who live and work on beautiful Værøy!*

Good choice!

1	Dagfinn Kristian Arntsen	1961		Dagfinn
2	Jill Chanett Arntsen	1975		Jill
3	Håvard Bjerkeli	1971		Håvard
4	Randi Andreassen	1964		Randi
5	Martin Kristian T. Fagertun	1999		Martin
6	Karin Sofie Langbakk	1957		Karin
7	Frank Ramberg	1980		Frank
8	Turhild Kvalnes	1940		Turhild
9	Ole Petter Adolfsen	1947		Ole Petter
10	Siv Pedersen	1953		Siv
11	Bjørn Tore Sørheim	1983		Bjørn Tore
12	Erlend Voldset	1988		Erlend
13	Terje Jensen	1974		Terje

Værøy
- a living coastal community
Work Program
Værøy Christian People's Party
2019-2023

Værøy is a wonderful island where it is good to live. Værøy is also one of the truly authentic coastal communities along our coast. Værøy is a society that lives by what the sea provides. Food and especially seafood are sought after. This should provide the island community with good opportunities for both population conservation and securing the services needed to maintain a

LIVE COASTAL SOCIETY

Against this background, Værøy KrF will present some thoughts and ideas that we would like to call our "work program" for the next four years.

CHILDREN - GROWING UP - CULTURE

What influences on the upgrowing part of the population - affects us all! That is why we regard this part of our policy as very important. Værøy KrF wants good framework conditions for growing up in all contexts. "New Kindergarten" was such a venture that we got into position during the current period.

We have also started work on the completion of construction phase two at Værøy School. We want to get it implemented with the plans below preparation - in close collaboration with Værøy Idrettslag.

We also want to work for an offer from The county council linked to high school - similar to what previously went under the hub Fringe School / LOSA. An offer for a first year of higher education - on the island.

We wish

- First year of higher education locally
- Be a driving force for volunteering organizations
- Continue the Municipal Youth Club
- Increase funding for municipal cultural resources

HEALTH

In the coming period, Værøy KrF will work to ensure that those in need of municipal services in the health sector receive the best possible offer. We have also increased our resources in the field of intoxicants and psychiatry to a whole position - we also want to focus on this area in the next period. During this period, we also got the extension of a health nurse to a full position, and wish to continue to work purposefully with preventative work among children and young people.

New nursing home and work on future operation of this service will influence the political work in the

next period.

If we are to succeed in a renewal, we must probably think long-term, and prepare for what will come of development and innovation in this sector in the future.

We wish

- God school health service
- Continued strong focus on development in the intoxicants sector
- Strengthen mental health work
- That the midwife service is maintained
- That the Environmental Service is maintained at the minimum current level
- Maintain today's dental health service
- That the physical therapy service be continued
- Increased focus on universal design

THE MUNICIPALITY

During the municipal government period that is behind has municipalities have been changed. Many municipalities have chosen to merge with good neighbors. We chose to say no to merging with neighboring communities. It provides opportunities - but also challenges. The requirements for good services are the same for us as in a large municipality. Therefore, it becomes important to find good solutions to the many demanding tasks that we are required to solve.

In the current period, we have added Child Protection and Fire Services to collaborative solutions in the Salten region.

Municipal economics will also be a very demanding task for the next four years. We want to work to change the statutes of Lofotkraft Holding so that the sale of our shareholding can be completed. It could bring in between NOK 20-30 million with the present value of the company. We intend to use these funds for deductibles in schools and nursing homes.

We wish

- Seek good collaboration solutions with surrounding municipalities for the statutory the services we need to solve
- Work for possible sale of our shares in Lofotkraft Holding
- That Værøy municipality should pass as an independent municipality

COMMUNICATION

Efforts to maintain / strengthen communications at sea and in the air have been demanding in the period behind. But we got a breakthrough for maintaining today's helicopter offer. Ferry services have been somewhat strengthened / expanded in the summer. With the frameworks projected in the years to come, it is enough to require increased work to secure today's offerings.

We wish

- Still hard work to ensure good communication to and from Værøy
- Work to maintain the island's county road network
- Keep working for two ferry limbs on the ferry dock
- That Skaret is racially protected

MILJØ

Environment Værøy is a society that lives on the resources of a clean sea. Both we as citizens and the industry operating here should live accordingly. The easiest thing to do with it is what you and I do. Renewable energy is important and we should keep an eye on what is happening in this field. In the current period, we have begun work on a comprehensive review of waste management in a broad sense. We hope it will provide answers to what and how we can organize this sector in the future.

We wish

- An overall waste management plan that includes a co-location of waste
- Soon introduction of plastic source sorting
- Increased focus on E-KEY measures
- Increased work to improve water and sewerage

BUSINESS

The island's business sector has developed a great deal in recent years. Værøy is today Nordland's largest fishery municipality and among the 10 largest nationwide!

A great development for our island.

We who manage the public sector must be active contributors, so that this positive development can continue.

It was therefore a very important impact that we got new entry / expansion of the ports in place National Transport Plan. The trend is towards larger vessels. In order to maintain the supply of raw materials and export our products, it is important to have good port infrastructure.

We will work hard on this in the coming year.

We also see that tourism will become a sector that will increasingly characterize the island. In order to meet this development, it is crucial to have a good cooperation between the private business community and the municipality. Collaboration throughout the Lofot region is also essential for the sustainable management of nature.

Tourist tax can be an opportunity to facilitate increased tourism.

We wish

- To cooperate with the business community in mind to strengthen the positive development
- Work to mark Værøy as lutefisk's "Mecca"
- Saying no to oil activity outside Lofoten and Vesterålen
- That work is being done to increase the asset within the tourism industry
- That youth comes back to the island, find it job exciting, and want to settle down here
- Work to limit the catch of redfish
- Investigate the possibility of selling the Seawater plant

***Værøy KrF wants the islanders
a really good choice!***
